

PLAY & LEARN DEVELOPS A \$150,000, STATE OF THE ART, MULTI-AGE PLAYGROUND

Blue Bell, Pennsylvania, June 25, 2009- Play & Learn recently invested over \$150,000 on its multi-yard playground at the Blue Bell center, as part of the on-going commitment to families to provide the best not only in education but also play.

Play & Learn, providing early childhood education since 1981, has completed their new playground at the Blue Bell location. Situated on one acre, the playground is enclosed to offer age segregated play areas.

With the guidance of a licensed playground consultant, the multi-age playground now boasts expanded play areas, artificial grass that is safer and cleaner, new toddler and preschool climbing equipment, an expanded hard surface area for bikes and games, all new fencing and an infant play yard, complete with soft foam mats and climbers.

Parents and children alike are captivated at the site of the new playground when they visit the Blue Bell Play & Learn for the first time. There is something for all ages.

Outdoor play is an important aspect of the Play & Learn philosophy. The development of gross motor skills, exploration of nature and cooperative games are all learned through outdoor play. This new, exciting space has already provided challenges and opportunities. For more information on the Blue Bell Play & Learn and the nine other locations in Montgomery County and the programs offered, call 216-643-4142 and visit www.playandlearn.com.
